

## **Environmental Sustainability**

LDS supports the needs of the present without compromising the ability of future generations to meet their own needs. Sustainable development must address environmental, economic and social features and relationships between them.

LDS ensures all environmental risks are assessed, managed, controlled and best practise adapted.

LDS keeps its staff informed on matters of the environment and adapts to maintain and develop its work practises in a sustainable manner.

This policy applies to all activities undertaken by LDS (or on behalf of).

### **Policy Statement**

LDS recognises the importance of the role it has to play in the environmental stewardship and promoting principals of sustainability with its staff, clients and suppliers.

LDS will manage and control its environmental risks in a sustainable manner by complying with relevant legislation and adopting where appropriate best practice. We will also endeavour to integrate the principals and sustainability into its strategies, policies and procedures.
